

Making Childcare Affordable:
A call to Action for Government Officials
Addressing High Childcare Costs for Economic Stability

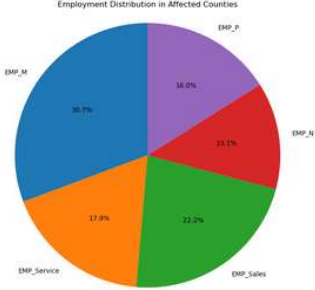

Current Economic Condition :

1
Differences in Income :
visualize changes or differences in income between the values reported in 2018 and the overall average

2
Employment Breakdown Across Sectors in Affected Counties :

Each slice of the pie represents the proportion of employment in that specific sector relative to the total employment across the affected counties.

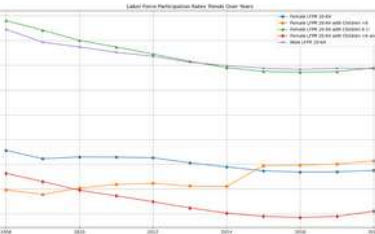

Childcare Cost Analysis :

1
Trends in Childcare Costs Over Time by Category :
chart illustrates how childcare costs for each age group have changed over time, making it easier to identify trends or increases in the cost of care.

Impact on Families :

1
Labor Force Participation Rates :
Graph will show the trends in labor force participation rates over the years, allowing you to observe how they vary for males and females, and for females with children of different age groups.

Call to Action :

1
Increase Tax Credits :

Increase Tax credits based on household income. Propose state tax credits based on the childcare costs.

2

Wage Subsidies :

Offer wage subsidies to childcare providers to help them keep costs down and offer affordable care to families.

3

Quality Standards :

Set high-quality standards for childcare providers and offer funding to help them meet those standards.

Introduction to Childcare Quality Standards
